

Approved Connector List

In accordance with version 1.3b of the HDMI Compliance Test Specification (“CTS”), HDMI Licensing, LLC will maintain a list of approved connectors (“Approved Connector” list). For a device to pass CTS 1.3b testing at an Authorized Testing Center (“ATC”), all connectors on such device must appear on the Approved Connector list. To add a connector to this list, the system or connector vendor must test the connector at a qualified facility of the vendor’s choosing, and the vendor must then submit to the ATC or HDMI Licensing, LLC full and passing testing results as set forth in the Connector Test Result Form (“CTRF”). The CTRF is available on the **Adopter Extranet**. Only HDMI Adopters may add their products to the Approved Connector List.

Successful completion of the CTRF and/or ATC Testing, and the fact that a connector is listed as an “Approved Connector” below does not guarantee that any connector or product will conform to the High-Definition Multimedia Interfaces, function correctly or interoperate with any other product. Each Adopter is solely responsible for ensuring that its products function correctly, fully comply with the HDMI Specification and Adopter Agreement, and interoperate with other products.

There are currently two types of connectors available:

Type A Connectors
